

Abrasive Wheels Mounting

Cutting off and Hand grinders

A certificated Half day course

Attendance dates to meet YOUR needs at YOUR place of work

Delivered by a Tutor who is a Chartered Practitioner with IOSH a Mechanical Services Engineer and a Chartered Construction Manager

Passport card
and certificate

We can train on your portable tools or we can bring an angle grinder and/or Stihl saw.

This is an excellent course for trade professionals, operatives and others and meets the legal requirements for competence to use these machines.

We will work with your abrasive wheels which are electric angle grinders and cutting off wheels, air powered angle grinders and petrol (or battery) powered cutting off wheels.

*The type of abrasive wheels depends on what you use at work.
Call us and we can design the course to meet your needs.*

The course includes the legal requirement and responsibilities, safe use of cutting off / angle grinding machines in this category, the correct personal protective equipment, how to select certain equipment properly. The correct selection of abrasive wheels and knowing those at high risk, dangers to be aware of, safety precautions, correct mounting and set up, checking for defects with practical examples. Dust control methods and RPE.

Practical speed testing of machine wheels, how to compute the comparative safe speeds. Safe working methods and handling etc. Practical safe mounting of the wheels. Final competence is a practical and written based assessment.

Course content and duration may vary as a result of changes needed to comply with the requirements of legislation or necessary updates etc, but details were correct at the time of publication.

(you can have as few as you like in the group or the max permitted or even 1:1 tuition)

Quotations by BST are provided for the course to meet your specific requirements and will vary dependant on the number of candidates, distance, and venue etc.

Course notes included, **Half days tuition** (typically 0900 to 1230)
